GitHub

I am a **Full Stack Web Developer** with experience in **Ruby**, **Rails**, **JavaScript**, **React** and many more technologies. I am seeking a position at a company where I can contribute my expertise and continue learning.

## Projects

**Sportsblr** **(Technologies used: Ruby on Rails | PostgreSQL | AWS S3 | Ajax | JavaScript | React | Redux | HTML | CSS | Heroku | Github)**
March 2020                                                                                                          live | github
- **AWS S3** to implement **media** uploads, reducing server load and allowing for scalability of media services.
- Implemented **user authentication** using **Bcrypt** and to hash user's **password**.
- Created a **modal** using **React** that allowed me to efficiently create different types of forms for posting a variety of contents.

**Rise** **(Technologies used: MongoDB | Express | React | Node | Axios | HTML | CSS | AWS S3 | Heroku | Github)**
March 2020                                                                                                          live | github
- Used **Mongoose** populate to fetch underlying related **data** across multiple **collections**.
- Utilized **React's** re-render feature to update the cart's quantity dynamically.
- Designed original **UI** using **HTML** and **CSS** including toggle buttons that react to mouse hovers.

**Study Hall** **(Technologies used: MongoDB | Express | React | Node.js | GraphQL | Apollo | HTML | CSS | Docker | Heroku | GitHub)**
April 2020                                                                                                          live | github
- Designed custom **UI** using **HTML** and **CSS** including the change of colors of question options and the mastery points spin when hovered.
- Utilized **GraphQL** to fetch **API** requests from the backend.

**Crazy Taxi** **(Technologies used: JavaScript | jQuery | HTML | | CSS | Webpack | GitHub )**
April 2020                                                                                                          live | github
- Used **jQuery** and **JavaScript** to manipulate displaying of content on different stages of the game.
- Utilized **CSS media queries** to create a fully responsive , device agnostic design.
- Leveraged custom **event listeners** to dynamically play-pause toggle buttons with music-player.

## Education

**Associates Degree, LONE STAR COLLEGE**
June 2015 — May 2017
- Associates of Arts (AA) Degree

**Coding Bootcamp, App Academy**
October 2019 — May 2020
- Rigorous 1000-hour **Software Development** program with <3% acceptance rate.
- Teaches Full Stack Development: **Ruby | JavaScript | React | TDD | OOP | Web Development best practices**

## Employment History

**Assistant Warehouse Manager at SutongCTR**
June 2015 — November 2017
- **Inspected** all receiving and shipping orders, scheduled pick-ups and deliveries with trucking companies.
- Utilized **SAP** Business One **software** to keep track of inventory and generate related documents.
